

Discussion Questions about External Assets

External Assets are the external structures, relationships, and activities that create a positive work environment. As you work to improve in these areas, discuss the following questions:

- Are the teachers in your school dissatisfied? How do you know?
- What are the specific causes of job dissatisfaction in your school?
- What kinds of changes would you like to see? Are the changes you're looking for specific to your experience, or could they apply to your colleagues' situations as well?
- What conversations need to take place to make changes in each of these external categories?
- Who needs to be present for these conversations? Who needs to lead?
- Who can help you get started in improving your own job satisfaction?
